DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's admitted prior art (AAPA)

AAPA as found on page 1, lines 15-17 of the specification, discloses discloses a gas turbine engine component having a key ring stud/ a workpiece having a key ring.

It has been held that "[E]ven though product-by-process claims are limited by and defined by the process determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

Allowable Subject Matter

3. Claims 1-8, 11 and 12 are allowed.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
